

HIGH BULL

Welcome to the
Futuristic
Innovative
Boundaryless
and
Everlasting
crypto asset in
the world

www.bighbull.com

WHAT IS BIGH BULL

BIGH BULL endeavours to leverage on its high-tech technology and innovative solutions to help and support investors, traders as well as every common man; to learn, execute and maximize gains from **forex, stock, crypto trading** and other technology based products and services

PROBLEMS BEING ADDRESSED:

Trading of stocks, foreign exchange and other commodities is an ancient business which has evolved over the last 100 years and has seen revolutionary developments. Despite sophisticated trading tools available in modern times, majority of the investors/traders burn fingers and absorb huge losses due to primarily three problems:

- Lack of time due to occupational engagement and family priorities
- Lack of knowledge, absence of fundamental research and analytics and propensity to trade based on hearsay and media hyped news
- Even the well informed and regular traders are subject to human errors like emotions, lack of speed to respond on the terminal, instantaneous decision-making to take positions and also the very key issue of not being able to trade 24/7 as Global Markets operate in different time zones

Bigh Bull did a detailed research and identified these three problem areas and succeeded to create innovative and advanced technology platforms that would address all these problems

OUR SOLUTIONS:

Bigh Bull will have **11** Innovative Platforms to address the three problems mentioned above:

There are three platforms (General Trading, Automated Copy Trading, BOT Trading) each for stock, crypto and forex trading, one platform to provide real time rate comparisons between top ten crypto exchangers to help traders pick the best price named **COTOEX** and one **Educational Platform** to disseminate technical education on areas such as **Stock, Forex, Crypto Currency Trading** and **Blockchain Technologies**.

11 UNIQUE PLATFORMS

HOW BIGH BULL IS DIFFERENT FROM OTHER CRYPTO PROJECTS?

- **Our projects are not dependent on any specific technology:** we are working on various technologies like Public and Private Blockchains, Smart contracts, Artificial Intelligence, etc.
- **We are not dependent on any specific sector:** we are working on many sectors like **Stock Market, Forex Market, Crypto Market and Education, etc.**
- **We are not affected by time:** people have been trading since thousands of years and will be trading for next thousands of years. We are primarily focused on Trading solutions and our innovative and advanced technologies make it further stronger
- **We are always profit-making:** most of our projects are trading and advanced technology based, which are designed to cater to financial markets of a large size. All these platforms will help us make profits regularly, which we can use for further research, promotions, developing new products and services, etc.
- **We are always gathering new customers:** rate of coin/asset always depends on demand and supply. As we have a fixed token supply in our hand, to keep our token rate rising, we have to focus on creating a demand only. As we provide solutions for various sectors and we have multiple products and services in our hand, our products and services are becoming a customer generation machine

And that's how we envision being a futuristic, innovative, boundaryless and an everlasting crypto asset in the world.

OTHER PROJECTS

BIGH BULL BLOCKCHAIN

- BIGH BULL Blockchain having latest Consensus Algorithm
- NFT & GameFi Metaverse Integration Possible
- Blockchain Documentation for Stakeholders
- BEP20, BEP721 and BEP1155 Compatible
- Blockchain Status monitor
- MetaMask Integration
- Testnet Faucet App
- Testnet Blockchain
- Blockchain API

CRYPTO WALLET

- Allows transactions across multiple cryptocurrencies
- Wallet is pre-integrated with **BIGH BULL** Blockchain
- Allows instant transactions across geographies
- Low transaction fees
- Highly secure
- Easy to use
